

KINECT

The **Kinect Nevma**© is an complete interactive Digital Signage and Content Management solution, specialized on digital content (e.g. Presentations, Images, Photos, Videos etc.). It is based on Microsoft® Kinect technology offers the potential to transform how people interact with computers.

It's time to let go what you knew until now about content presentation or digital signage systems, since you need to have a PC and all the necessary controls such as: mouse, keyboard, remote controller, special paddles or a touch screen monitor.

The **Kinect Nevma**© leaves behind the interaction methods used by millions of users around the world till now, offering a **unique interactive experience**. The **Kinect Nevma**© developed by Alpha Information Technology S.A. and Exedron Software Ltd., incorporates a revolutionary technology, enabling everyone to experience a unique experience on Digital Signage (interacting and navigating in the digital content presentation), using their own body as a Controller.

Introducing a new age in business interactive show room, product or services exhibition, all you need is to stand in front of the **Kinect Nevma**©, to select and view the available digital material using your body movements with a unique way, without having to hold any controller! The **Kinect Nevma**© will recognize you and will follow your movements using gesture commands (*nevma in Hellenic*) as you select the section of your interests

from the available digital content, giving you the ability to navigate without having to go through unnecessary screens or information to reach the field that you are interested.

The direct response offered by **Kinect Nevma**© to the visitor or client, dramatically transforms the displayed advertising material on a store window or a showroom, providing business targeted and effective product advertisement or other digital content, under the visitor's / client's commands and options.

Experience increases, by the variety of content and capabilities that can be incorporated into **Kinect Nevma**©, according to the requirements and characteristics of each of our client to achieve best result their customer experience. The **Kinect Nevma**© is the future of interactive advertising and promotion tool in various applications and particularly by the targeted interaction.

The innovative applications and the revolutionary technology of **Kinect Nevma**© meet the needs of many and different sectors like healthcare, education, construction, technology, industry and many more.

Kinect Nevma
